Cmnts de George Zeller: The 1992 Passport to Worldband Radio lists VoTomorrow in the clandestine section. "Passport sez a gd source claims that the nonbust of VoT despite DF'd QTH/Pgm content/longevity/gd sigs/long pgms/etc is an intentional FCC policy. Reasoning: They think bust'd call attention to stn & its views, so they dont bust it.
 "I assume Magne's source is gd. So what have we here? NeoNazi stns are OK to the FCC cuz they dont want to call attention to them, but busts of other pirates are OK cuz FCC does want to call attention to them? Something does not add up here."
 I disagree w/this cuz the VoT only bdcsts for 1-3 hrs only abt 1 nite per year. As has already been demonstrated in '91 by R.USA, KUSA, & R.F.America, 2+ hr pgms dont mean an immediate bust. At their low level of activity, I can't see how the VoT cud be an FCC priority...AY
 Book nx: I'm working on another book & need advice & tips on bdcsting, recording, & black & white photos of studios, xmtrs, antennas, ANYTHING! The studios chapter is almost done..Any help is appreciated!..Thanx..AY

Dline for #66: Send logs out no later than 12/30

Stn nx: WSKY is now using the Wellsville add according to their anmnts...The Voice of Anarchy says that they are now pumping out 250w from a Dentron GLA 1000B Linear amplifier. I would guess that their range has improved now...Speaking of power, Wire Line Radio (WLR) has gotten in touch with me and they are now officially using the BRS add. Their power output varies, depending on what transmitter/amplifier combo they are using. However, power is as high as 1 kw...R.Boner Intl: Are you out there? George Zeller has a ltr for you de R.Peace in Action from Germany. Write to George via his add at the end of the PSE QSL list...

Some of you computer-heads out there might be interested in 7415, the pirate newsletter that John Brewer puts out. If you're interested, send to: Pirate@anarky.enet.dec.com Easy enuf?

Those of ya upset by all the activity on 7415, why not try another freq..or day. John Arthur editorialized on this in the Dec ACE, but I have a few addt'l comments. Why not try operating on a sunday or on Christmas day (as opposed to saturday and Christmas eve)? Why do so many stns feel they MUST bdcst when another stn is on (and on their freq)? Hopefully, this holiday season will be "jam-free." Those of you who pirate, please be courteous...

Sorry if your logs didn't make it into this PiPa. I waited until friday to start typing. Even after 5 days, I only had logs de a few folks. The USPS is REALLY bogged down. Some of these logs are tentative and subject to change for the next issue. Also, the next issue will probably contain a few broadcasts that weren't logged in this issue. Hopefully you will all receive this within a reasonable amount of time...And, Merry Christmas!! Sorry that I Didn't send out any Christmas cards again this year, but it's been another VERY busy year & it's been all I can do just to get PiPa out on time. Hope ya'll have a truly nice season and that you can catch lotsa good holiday pirate pgms.
